

Name of Insured: _____

The COVID-19 pandemic has impacted every organization across the country. For many municipalities it meant shutdowns; the cancellation of services; parking of vehicles; etc., while for others, it meant offering new services like food delivery for those in need; opening facilities as assessment centres or for COVID screening; providing space as homeless shelters; or to facilitate social distancing.

Some clients approached us for rebates on their insurance. Intact Public Entities has considered this carefully. We want to be fair in acknowledging the pandemic's impact while at the same time recognize that municipalities have been affected differently and to varying degrees.

We have created the following basic outline that will aid our Underwriters in quantifying the premium impact specific to your municipality. Note that revenue loss or business interruption is not recoverable. We are looking solely at disrupted services for which we currently charge a liability premium; properties that have a liability premium associated with occupancy (arenas, pools, etc.) as well as vehicles that are off the road.

FACILITY CLOSURE

Type of Facility and address: _____

Closure date: _____

Date reopened: _____

FLEET

Year _____ Make _____ Model _____

Date parked: _____ Date back in service: _____

SERVICES AND PROGRAMS:
